                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    05-JUL-1999 (first entry)
                                                                                                                                                                                                                      The present sequence is the mouse bcl-w gene encoding Bcl-w protein (see AAY05531), a pro-survival member of the Bcl-2 family which is widely expressed and which is essential for spermatogenesis. The invention relates generally to a method of treatment and to an animal model for the identification of molecules and genetic sequences useful for inducing or reducing fertility of male animals. Methods are provided for the treatment of infertility, or animals.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Mus sp.

                                                       for reducing fertility, by modulating spermatogenesis. An animal model carries a mutation is at least one allele of the human or murine bol-w gene or in a gene associated with bol-w. Such animal have disorganised seminferous tubules and are substantially infertile, but possess no other major abnormalities as determined by histological examination. They can be used to screen for therapeutic molecules including genetic sequences capable of inducing, enhancing or otherwise facilitating spermatogenesis in inducing, enhancing or otherwise facilitating spermatogenesis in
                                                                                                                                                                                                                                                                                                                                                                                                                                  An animal model exhibiting reduced levels of a Bcl-w protein and/or protein associated with Bcl-w \,

The bcl-2 family have both apoptotic activity and the apoptosis blocking activity. bcl-y falls in the apoptosis activity category. The recombinant protein may be used to prevent uncontrolled cell growth, either by its direct administration to recombinant genetic constructs to increase its expression in vivo. Also, antisense constructs can be used in disorders where prevention of cell death is desired.

The present sequence encodes rat bcl-y protein (Rbcl-y). The cy specification also describes human bcl-y protein (Hbcl-y). Rbcl-y and CC Hbcl-y are homologues of the bcl-2 protein thought to be involved in CC proteins may be used to treat conditions associated with a disruption of CC proteins may be used to treat conditions associated with a disruption of CC conditions associated with a disruption of CC calleimer's Disease, neural and muscular degenerative diseases and treat subjects suffering from: strokes, head trauma, CC cell death, aging, spinal cord injuries and amyotrophic lateral cCC cell death, aging, spinal cord injuries and amyotrophic lateral as a cclerosis conditions where cells under go premature cell death as a cclerosis conditions where cells under go premature cell death as a cclerosis way to develop cell lines which remain viable in culture for cused in this way to develop cell lines which remain viable in culture for an extended period. In contrast, if they act as cell death stimulators, cc Rbcl-y and Hbcl-y may be used to treat conditions associated with
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     401

The C invention relates generally to a method of treatment and to an animal model for the identification of molecules and genetic Sequences useful for inducing or reducing fertility of male C animals. Methods are provided for the treatment of infertility, or C model carries a mutation is at least one allele of the human or C model carries a mutation is at least one allele of the human or C marine bcl-w gene or in a gene associated with bcl-w. Such animals C infertile, but possess no other major abnormalities as determined C by histological examination. They can be used to screen for C inducing, enhancing or otherwise facilitating spermatogenesis in animals. Or which can indice infertilety.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                X F X PD

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             expression in vivo. Also, antisense const where prevention of cell death is desired.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    falls in the apoptosis activity category. The recombinant protein may falls in the apoptosis activity category. The recombinant protein may be used to prevent uncontrolled cell growth, either by its direct administration to recombinant genetic constructs to increase its expression in vivo. Also, antisense constructs can be used in disorders expression in vivo. Also, antisense constructs can be used in disorders.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    The mammalian bcl-y genes encode a protein that is a member of the bcl-2 family, components in the cell death pathway. The bcl-2 family have both apoptotic activity and the apoptosis blocking activity. bcl-y falls in the apoptosis activity category. The recombinant protein may
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Claim 3; Column 15/16; 27pp; English.
